

TPLO 201 – Next Level

April 16-17, 2025

Online Pre-Course Assignments will include:

- What TPLO is NOT good at.
- Detecting the patient at risk of residual post-TPLO rotational instability and identify options to pre-emptively treat it.
- How to intraoperatively assess for mild tibial torsional and varus deformity and how to make subtle corrections with the TPLO jig.
- Do Small breeds need TPLO?
- Assessing and treating the patient with concurrent CrCLD and Patellar Luxation.
- Identifying patients with excessive TPA and caudal tibial long axis shift (TLAS) for whom TPLO is not indicated.
